## About Me

As a computer science student with outstanding organizational and communication skills, I am an ambitious and dedicated person who works well with others. I have a proven track record of handling high-pressure situations and quickly resolving challenges. I am confident in my ability to make meaningful contributions to any team and to bring value to any organization.

## Education

### Faculty of Science - University of Sarajevo

*October 2020 - Present*  
Mathematic and software engineering

### IT Academy by LINKgroup

*November 2020 - September 2021*  
Java development

### First Gymnasium Sarajevo

*2016-2020*  
Mathematics and computer science

## Experience

### Sarajevo Unlimited

*October 2023 - November 2023*

I was a team leader for a team of volunteers, participating in the organization's Forum activities.

### TEDx Sarajevo

*November 2022*

My task at the TEDx conference was the organization of the conference itself. The theme was Perception where successful women shared their experiences and gave excellent advice. They allowed me to have a different view of the world of employment where women also have a significant impact and taught me that we should not give up when we encounter the first obstacle.

### EYOF 2019

*December 2019 - February 2020*

I was an assistant to the Swedish National Olympic Committee, and my task was to make the guests' stay in our country more comfortable and to be their right hand at all competitions. Through this experience, I gained better organizational and soft skills, met other cultures and wonderful people.

### Youth Film Festival Sarajevo

*2018-2021*

Throughout these three years of volunteering at the Youth Film Festival, I had various roles and tasks. I mainly worked with festival guests, actors, directors, and many others. I gained more confidence, and this experience helped me to improve my communication skills.
